

*Storage Regulation – draft trajectory
filling targets for 2023*

Vienna, 25 February 2018

Decision on intermediary targets for 2023

By 1 November, 90% in each year starting from 2023

If a Contracting party is not able to meet the filling target due to specific technical characteristics, the deadline shall be postponed to **1 December**

2023 onwards

By 15 September of the previous year - Contracting Parties shall submit a draft filling trajectory with intermediary targets based on the average filling rate during the preceding five years, to the Energy Community Secretariat.

By 15 November, the Energy Community Secretariat (ECS) shall adopt a decision setting the filling trajectory for the following year for each contracting party.

Decision on intermediary targets

Decision shall be based on basis of the technical information and draft filling trajectory with intermediate targets submitted by each Contracting Party

No Contracting Party sent official data

Filling trajectory and the intermediate targets shall be based on the average filling rate during the preceding five years

On the basis of an assessment of the general security of gas supply situation and the development of gas demand demand-supply in the Energy Community and individual Contracting Parties

Taking into assessment of the **Security of Supply Coordination Group**

proposal on intermediary targets 2023

Contracting Party	February 1 st Intermediate target	May 1 st Intermediate target	July 1 st Intermediate target	September 1 st Intermediate target
Serbia	50%	15%	45%	70%
Ukraine*	33%	23%	47%	58%

* the intermediate targets of the filling trajectory shall be reduced accordingly by 35% multiplier

The background is a satellite-style image of Europe at night, with city lights visible. Overlaid on this are numerous glowing blue lines that represent energy transmission paths, connecting various points across the continent and extending outwards.
