

## Training on Marketing Renewable Energy

21 December 2021 | 10:00 to 13:00

Webex

### SCOPE

It is a new era in the energy sector and beyond. Investments in renewable energy is outpacing investments in other technologies. As of December 2021, the (EU) 2018/2001 on the promotion of the use of energy from renewable sources, is part of the Energy Community acquis.

As the legislative package is being framed, a legitimate question if the market mechanisms applicable are ready to accommodate an increasing volume coming from renewable sources remains. This and many other challenges will need to be discussed and addressed as we walk through the decarbonisation pathway.

The course targets understanding the renewables impact in the market, trading and in particular balancing mechanism. The aim is to see also the experience from the market and discuss the mechanisms applied by market participants in trading electricity produced from renewable sources.

### AGENDA

10:00 – 10:10	Energy Community Secretariat
<b>Opening</b>	
10:10 – 10:40	Naida Taso Energy Community Secretariat
<b>CEP: New Renewable Directive</b>	
10:40– 11:10	Arben Klllokoqi Energy Community Secretariat
<b>Marketing and Balancing</b>	
11:10 – 11:50	Riccardo Rossi Centrica Energy Trading
<b>Corporate PPAs</b>	
11:50 – 12:20	Sofia Eng Nodes-market
<b>Study case: Adopting the market for renewables</b>	
12:20 – 12:45	ECRB
<b>ECRB ongoing work on RES</b>	
12:45 – 13:00	
<b>Q&amp;A and wrap-up</b>
