

European Environment Agency Energy Community Project

EnC TWG on UNFCCC
17 May 2024

European Environment Agency

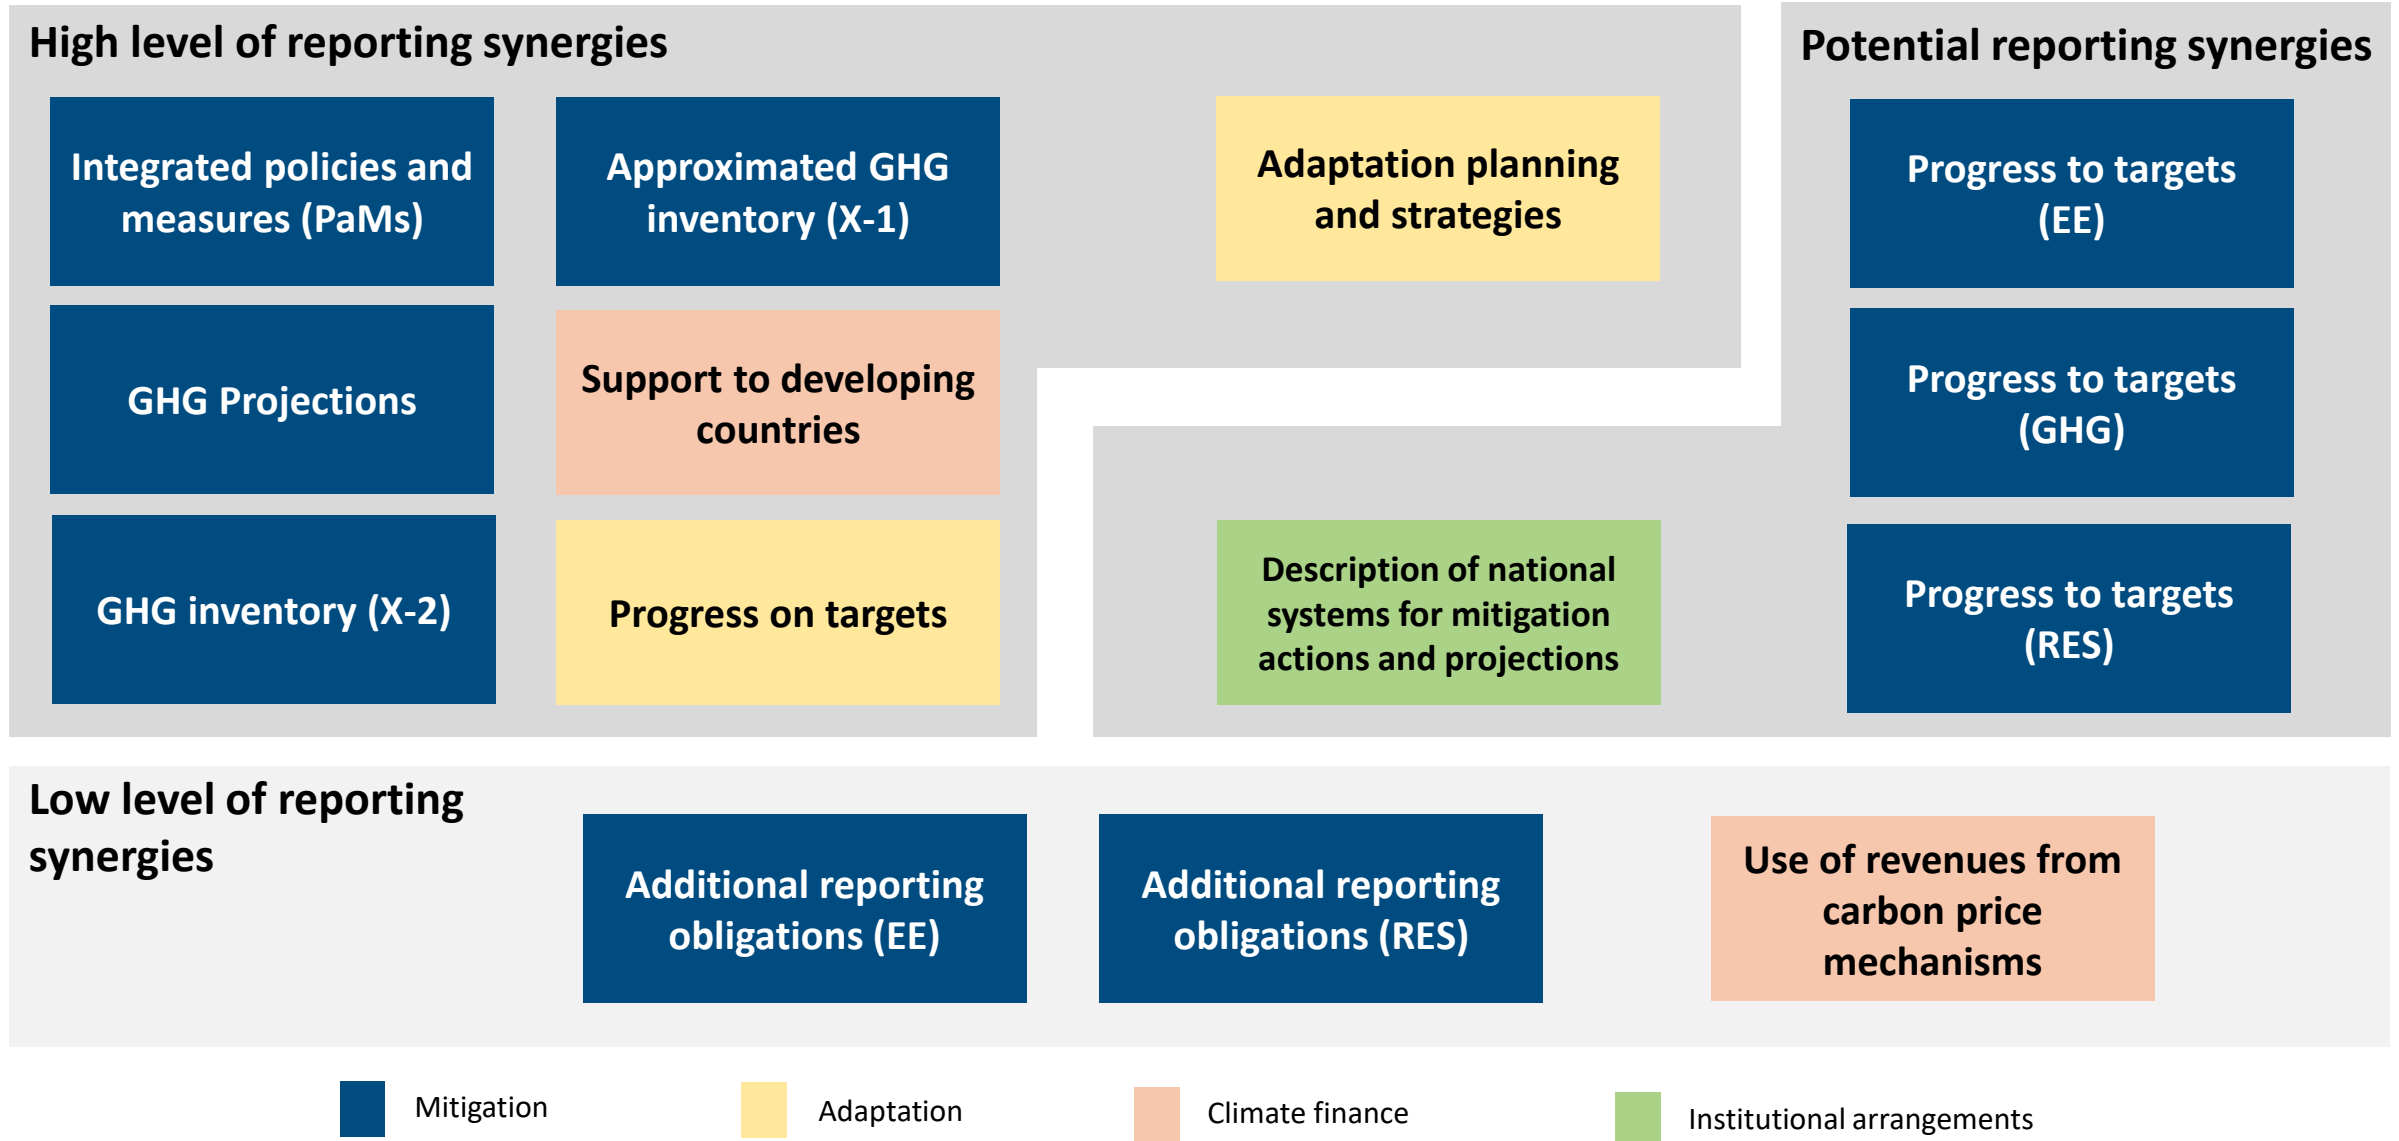

THE ENERGY COMMUNITY

EEA's role:

- Support the implementation of the adapted Governance Regulation
- Enhance the transparency and accountability of climate action

THE UNFCCC BTR AND THE EU GOVREG

SYNERGIES BETWEEN THE TWO REPORTING OBLIGATIONS

Same greenhouse gases and sectors

Use of common reporting formats (CRF) and national inventory reports (NIR)

Aligned verification and review process

Close alignment between the reporting guidelines for the adapted GovReg and the Adaptation Communication

Close alignment between the sections on financial support to developing countries

LESSONS LEARNED AND BEST PRACTICES

Key takeaways from engagements with CPs:

- Need for institutional arrangements for gathering data
- Reportnet is well-structured and provides a clear reporting framework
- Transposing the GovReg into national legislation
- Establishing climate reporting working groups at the national level to facilitate data collection and peer-to-peer learning
- Efforts to enhance the enabling environment to advance in the reporting tasks

OPPORTUNITIES FOR STREAMLINING

- **Aim:** Ease the IT reporting process
- Tool to transfer the overlap (EEA – UNFCCC reporting)
