

Contents of the Security of Supply Statement in GAS
Diversity of supply and geographical origin of imported fuels
Description of the gas system
Technological security and quality and level of the maintenance of the networks
Legal acts governing security of gas supply including PSOs
Current levels of gas consumption [bcm] and expectations for the next three years (i.e. 2018-2020); level of peak demand
Currently available production, storage (working, injection, withdrawal capacity) and import capacity [bcm] for the next three years (i.e. 2018-2020)
Forthcoming production, storage, transmission and interconnections investment for the next three years: <ul style="list-style-type: none"> <li>- authorised</li> <li>- actually in process of construction</li> </ul>
Role of gas in TPEC and in power generation; use of gas
Definition of all protected customers/their share in peak demand and annual consumption
Defined roles and responsibilities of the different gas market players (role of regulatory or other authorities inclusive) in achieving security of supply general policies
Minimum non-discriminatory and transparent security standards
Measures in place to curtail consumers in an emergency (restriction order); Specific customers protection measures during: a partial disruption of national gas supplies/extremely cold temperatures throughout a peakperiod/cold weather "1 in 20 years"; measures to cover peak demand
All potential cooperation measures with other Contracting parties, EU Member States and other neighbouring countries
Competitive impact on all gas market players of the set of measures designated to secure supply
Extent of long-term gas supply contracts concluded by companies established and registered on their territory, and in particular their remaining duration, based on information provided by the companies concerned, but excluding commercially sensitive information, and the degree of liquidity of the gas market
The regulatory incentives for new investments
N-1 formula calculation
Disruption scenario - loss of a major infrastructure
Identification of risks
