

28th ENERGY EFFICIENCY COORDINATION GROUP MEETING

Blin Berdoniqi,

Senior Officer for Energy Efficiency and Cogeneration
Ministry of Economy/ Republic of Kosovo

Metering and Billing

Metering and billing are targeted in the Law No. 06/L-079 on Energy Efficiency through:

- Article 16
- Article 17
- Article 18

District Heating of Prishtina “Termokos” in cooperation with MCC and KfW is implementing a project to change the billing method from per m² to per consumption.

District Heating of Gjakova in cooperation SEKO is implementing a project to change the billing method from per m² to per consumption.

Kosovo is also in the process of reviewing the current legislation of Energy, including EE Law and Energy Performance in Buildings.

The working group was established on the September 2021 in developing the Concept document on Energy Efficiency and June 2021 for Energy Performance in Buildings. Both of these concept documents should be approved by the end of the year!

Heating and cooling

Kosovo has implemented a Project in Heating and Cooling sector “Gjakova District Heating”- The newly biomass fired district heating operates with cogeneration.

Currently in cooperation with WBIF, Kosovo is conducting a feasibility study and ESIA for District Heating in 9 municipalities that will include the assessment for cogeneration.

The law on EE, Article 19 targets those measures.

- Administrative Instruction (Mee) No.04/2020 On The Heating And Cooling Efficiency Potential**
- Administrative Instruction (ME) NO.06/2020 on the Calculation of Electricity from Cogeneration**

Regulations on Energy Labelling

The regulations in regards to Energy Labelling the PHLG has requested from the European Commission, with the Support of the Secretariat to propose drafts delegated acts on labelling regulations*

Law on EE is under review, the new regulations can be approved by secondary legislation after the new law is approved.
