WB6 Sustainability Charter

The WB6 endorsed the Sustainability Charter (Paris, July 2016) to pursue a transition towards a **low-carbon** and **climate-resilient** energy sector

The Charter is a practical tool to implement the Paris Agreement at regional level, including a set of **regulatory, policy and practical measures** in 4 priority areas:

1. Improve **energy efficiency** governance;
2. Develop and implement smart support measures for **renewables**;
3. Foster **climate action**;
4. Increase **transparency of sustainable energy markets**;

WB6 Sustainability Monitoring Report

- ❑ The EnC supports the WB6 by **monitoring** the implementation of their commitments under the Sustainability Charter (**14 main measures and 55 output indicators**)
- ❑ A **progress report** outlining achievements and priorities ahead is regularly published; results will be discussed at the next **WB6 Summit (Trieste, 12 July 2017)**

WB6 Sustainability Monitoring Report – Priorities

Improve the governance of energy efficiency

- Creating the supporting legal framework (implementing the EPBD, EED, 3rd EEAPs);
- Designing EE investment programmes for renovation of residential and public buildings;

Implement smart support measures improving sustainability of energy systems

- Developing an option-paper to identify the most suitable approach for the implementation of RES market-based support schemes;
- Adopting RES market-based support schemes in line with the State Aid Guidelines;

Foster Climate Action

- Introducing legislation, governance and institutional arrangements for MMR in line with Regulation (EU) No 525/2013;

Transparency of Sustainable Energy Markets

- Establishing official, single administrative contact points for investors, providing relevant guidelines and dispute settlement advice in English;

Option paper – implementation of market-based support schemes

Identifying the most suitable approach
for the implementation of
market-based support schemes

Sustainability Charter - Measure II
Introduction of market-based support schemes
Options for a cost-effective development of the renewable energy sector
Sustainability Charter: Task 1a | 01 May 2017

1 May – Questionnaire

1 September – Final Draft

Discussion at next RECG

SUSTAINABILITY FORUM

“Clean Energy for a Sustainable Future”

Friday, 9 June 2017 – Vienna

“A multi-stakeholder platform to discuss the best ways to shift towards a sustainable, low-carbon Energy Community Region”

Thank you
