

*the clean energy package
our second energy transition*

Dirk Buschle
Deputy Director
Energy Community Secretariat

the clean energy package and we

- ▶ **europa's response to the energy transition is...**
 - ▶ a reaction to a global trend
 - ▶ paris rather than brussels
 - ▶ endorsing, not denying
- ▶ **... the energy community's second transition**
 - ▶ the first transition, unfinished business
 - deregulation
 - integration
 - ▶ the second transition, this time for real
 - the energy community kicks in
 - coal: a natural resource turned toxic

how to ride the energy transition

- ▶ **our „smart specialisation“: renewables**
 - ▶ more than just decoration
 - ▶ new circumstances
 - ▶ competitive awarding, new players and new contractual models
 - ▶ effective de-risking
- ▶ **what's the back-up?**
 - ▶ no one-size-fits all
 - ▶ the risk of stranded assets
 - ▶ infrastructure investment
 - ▶ a no-regret solution: better integration
 - trade RES with EU
 - a regional capacity mechanism

The background is a satellite-style image of the Earth at night, showing city lights. Overlaid on this are numerous glowing blue lines that represent energy transmission paths, connecting various points across the globe.

*Thank you
for your attention!*
