

4th Meeting ECDSO-E Task Force Network Planning

Technical requirements for connection of new users/producers to the grid

(Demand Connection & Requirements for Generators)

Venue: Energy Community Secretariat, conference room 516

Am Hof 4, 5th floor, 1010 Vienna

Date: 26 April 2024 at 10,00 hrs CET

10:00 - 10:15	Introduction to the meeting topic	Convener, ECS
10:15 - 11:00	Overview of the key technical requirements outlined in EU Regulations for Demand Connection and Requirements for Generators	Convener, ECS
11:00 - 12:00	Croatia Presentation (Sharing their EU experience regarding Distribution Grid Connection)	EIHP
12:00 - 13:00	Lunch Break	
13:00 - 14:30	Presentations	DSO from CPs
14:30 - 14:45	Discussion	Round Table
14:45 - 15:00	Conclusions	Convener, ECS

The primary objective of convening this meeting is to engage in a comprehensive discussion aimed at examining and understanding the technical requirements enforced by each DSO among CPs for connecting demand-side resources and generators to the grid. Through this discourse, the intention is to foster a deeper comprehension of the technical requirements governing these connections.

This meeting serves for sharing experiences, allowing each DSO to learn from the experiences of their counterparts, ultimately facilitating knowledge exchange in the scope of grid connectivity.

Presentation should contain:

Technical Requirements: Technical requirements set by DSOs for new connections (demand connection & generators), emphasis on grid capacity, voltage levels, etc.
