AGENCE FRANÇAISE DE DEVELOPPEMENT

AFD's Energy Transition Strategy 2019-2022

Goal

« Accelerate the energy transition of developing countries towards energy services accessible to all, efficient and carbon-free »

Strategic priorities

3 focus areas

Access to energy services for all

Energy efficiency and demand management

Modernised and decarbonised energy supply

3 acceleration levers

Support for energy transition policies

Mobilisation and strengthening of the actors contributing to the energy transition

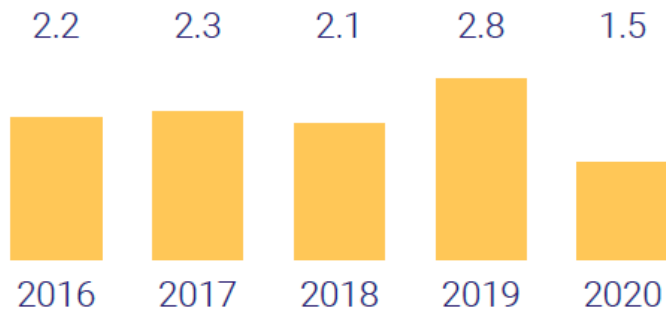

Support for innovation

The AFD Group commitments in the energy sector

Trend in Group commitments

Since 2016 in €BN

€11 BN

Total energy commitments since 2016

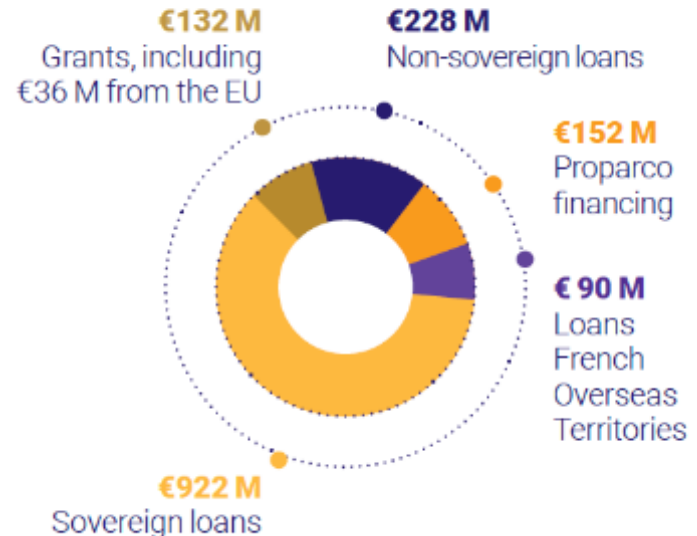

€1.52 BN

Total commitments for 87 projects

Figures of 2020

Axis 2: ENERGY EFFICIENCY AND DEMAND MANAGEMENT

Key areas of intervention:

1. Organizing energy sobriety in countries and territories.

- Planning for urban areas and transport
- Optimize facilities and equipment in urban areas
- Promote high energy-efficiency standards for buildings

⇒ **100% Paris Agreement
AND**

⇒ **100% Social link**

2. Developing an efficient and energy-efficient productive sector.

3. Supporting the implementation of demand-side management programmes.

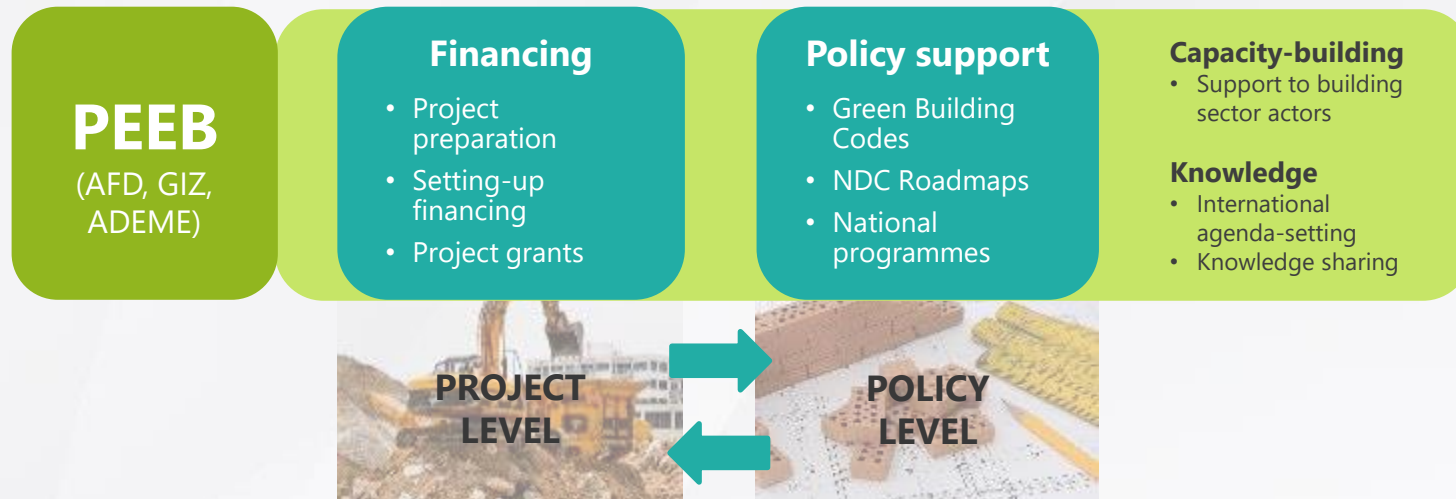

PROGRAMME FOR ENERGY EFFICIENCY IN BUILDINGS (PEEB)

Transforming the building sector through financing, policy and capacity-building

PEEB SERVICES

French-German initiative launched in 2018 implemented by **GIZ, AFD** and **ADEME**.

PEEB supports countries in their transition towards **low-carbon, energy-efficient** and **resilient** building sectors.

PEEB IMPACT TO DATE

35 projects

ongoing in
over

20 countries

EUR 3bn

pipeline

investment grant
6 M EUR
project TA.

EE interventions in the region Georgia

- Since 2018: policy reform program to structure the electricity market in accordance with the EU directives, and develop the regulatory framework for renewable energies and energy efficiency
- AFD support: multi-year program of Policy Based Loans to Georgia, with co-financing from KfW and grant support from the European Union. Total AFD funding is 355M€ (2018-2021)
- The reform should strengthen Georgia economy and embark in an energy transition in full compliance with the Paris Agreement. The program pays a particular attention to the promotion of energy efficiency both on the supply and demand side. It is critical to promote market efficiency but also to mitigate the impact of tariffs increase on vulnerable customers.
- Concretely
 - the program facilitated the adoption of energy efficiency and energy efficiency labelling laws in compliance with EU directives.
 - In the coming months, Georgian authorities should adopt the National Energy Efficiency Action Plan (NEEAP) as well as several secondary acts to operationalize the reforms.

EE interventions in the region Albania

- Since 2019: Policy-Based Loan in cofinancing with KfW to support energy sector reform, in line with EU Acquis. Total AFD financing: EUR 100M.
- EUR 1.5M Technical Assistance Package, to support reform.
- Includes: capacity-building program for the Energy Efficiency Agency (EEA), to improve structure, organization, performance and knowledge of the agency.
- Upcoming PEEB Cool: Albania to be included in PEEB Cool, with funding dedicated (loans + grants) to EE improvement of public buildings.

EE interventions in the region Moldova

- Latest addition to AFD's geographical scope: July 2021
- EE identified as key priority by the new government, to increase energy security by reducing energy consumption
- A programme for rehabilitation of public buildings is currently under finalisation with support from EBRD, EIB and the EU, for 75 MEUR. Loan and grant agreements under this project expected to be signed by end-2021, with implementation to start shortly after.
- GoM request for AFD to provide **complementary funding for this programme**
- AFD to assess possibility to provide loan + grant package to accelerate rate of EE renovation of buildings

THANK YOU !
