

- *Which lessons from the 2020 targets and present state of the energy system should we pay close attention to when designing policies for 2030?*
- *Which sectoral policies have you modelled to update your NDC and NECP?*
- *Which sectoral policies do you believe should certainly be modelled in the policy scenarios of the study?*
- *Which technologies do you see as the determining ones for the energy system in 2030 – with a view also to 2050?*
- *How should cost-efficiency be taken into account?*
- *Have you already modelled or explored your country's pathway towards climate neutrality? If so, what does it look like?*
- *What elements should be strengthened to better promote job creation, growth and competitiveness?*
