

# Workshop on implementation of REMIT in the Energy Community

Energy Community Secretariat, Am Hof 4, Level 6, 1010 Vienna  
12 September 2017 | 13:00 -17:30

Meeting material is available at: <https://www.energy-community.org/events/2017/09/REMIT1.html>

## Workshop Summary

Energy Community Secretariat (ECS) welcomed the participants and informed them that the workshop is aiming at exchanging views and experiences with the EU stakeholders regarding implementation of REMIT.

ECS presented the high-level concept, main assumption, the procedures and potential timeline of transposition and implementation of REMIT in the Contracting Parties. It also informed participants that the proposed concept and text is in principle agreed with the Regulators from the Contracting Parties.

Workshop participants were presented the experience from two EU Regulators in implementing REMIT, HERA and E-Control. Both Regulators noted the importance of REMIT and the need to engage stakeholders as early as possible in the process. It was noted that a proper market surveillance and the potential associated investigation require market knowledge and cooperation between Regulators.

Further in the workshop a panel of representatives from different stakeholders from the EU, such as ENTSO-E, ENTSO-G, EFETnet, GEN-I and GasConnect Austria, discussed about the complexity and challenges that come with REMIT and also their respective obligations under REMIT.

Finally, the ECS informed the workshop participants that in relation to data collection and surveillance under REMIT, it is also assessing different alternatives; therefore depending from the progresses follow-up workshops will be organized.
