SESSION

 26 JUNE

 14:00 - 15:30 PM

 ONLINE

**EUROPEAN SUSTAINABLE
ENERGY WEEK**

#EUSEW2024

Energy Community Secretariat's contribution to the 2024 'Sustainable Energy Days'

'Sustainable Energy Days' initiative

The European Sustainable Energy Week's (EUSEW) '[Sustainable Energy Days](#)' initiative is designed to bring various events organised by stakeholders under the umbrella of the EUSEW community. The purpose is to increase visibility and promote synergy between the individual initiatives and the overarching goals of the European Sustainable Energy Week.

The [Energy Community](#) (EnC) is an international organisation which brings together the EU and its neighbours to create an integrated pan-European energy market. It was founded in 2005 by the Treaty establishing the Energy Community. The key objective of the EnC is to extend the EU internal energy market rules and principles to South East Europe, the Black Sea region and beyond on the basis of a legally binding framework.

Energy Community

EMAS at the Energy Community Secretariat

The Energy Community Secretariat received its [Environmental Management and Audit Scheme \(EMAS\)](#) certification in 2021 and has implemented it ever since. As a contribution to the 'Sustainable Energy Days' initiative, our team would like to reflect on their stories with a specific focus on energy efficiency measures, illustrating how EMAS can transform your day-to-day operations. Join us to get inspired how to bring sustainable actions into your organisation.

"How setting up an EMAS changes your operations: The Energy Community Secretariat's story on aspects, impacts, rules & checks"

AGENDA

01

Introduction to EMAS

- *What is EMAS? What is it good for? What are the steps?*
