

Risk-preparedness Regulation implementation in EU

*Energy Community - SoS Coordination Group
10th Meeting of Sub-Group for Electricity
2 July 2021*

Risk preparedness regulation

- ✓ **Ex-post evaluation** of electricity crisis.
- ✓ More systematic **monitoring** (ECG) and reporting on MS' performance by ACER.

- ✓ **Designation of national competent authorities.**
- ✓ Common **methodologies** (developed by ENTSO-E and approved by ACER) for:
 - Identifying electricity crisis scenarios.
 - Assessing short-term adequacy issues.
- ✓ Identification of **regional crisis scenarios.**

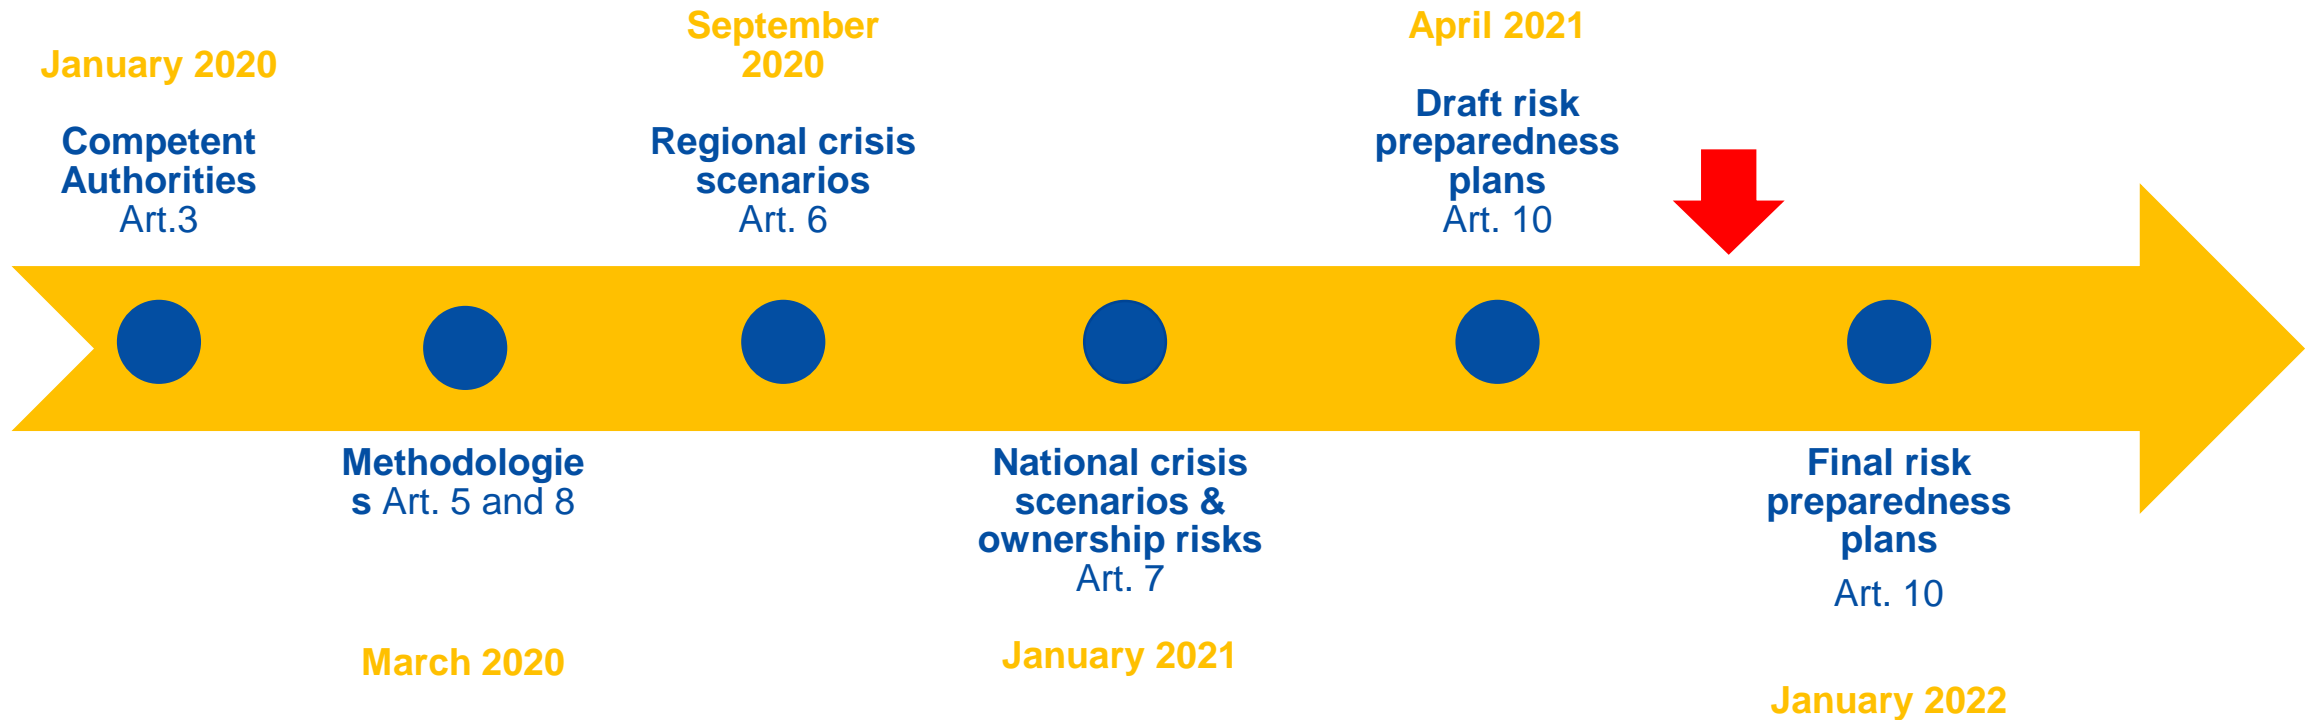

- ✓ Obligation to **inform EC and Member States:**
 - In case of electricity crisis.
 - "Early-warning".
- ✓ Information on the reasons of crisis, measures and need for assistance.

- ✓ **Risk preparedness plans** based on common rules, drawn up by the competent authorities:
 - Shall consist of national measures, regional and, where applicable, bilateral measures.
 - Prior consultation of other MSs and the Electricity Coordination Group (ECG).
 - EC can issue opinions on the plans.
 - Plans have to be published.
- ✓ EC provides **non-binding guidance** regarding the cooperation and assistance mechanism.

- ✓ **Market comes first:** non-market measures can be taken only as a last resort measure.
- ✓ **Cross-border co-operation and assistance.**

Implementation overview

Next steps: Possibility for a recommendation by the ECG on the draft risk preparedness plans - Art. 10(5)

Adaptation in the Energy Community

- Working on a possible **adaptation** of the CEP in the Energy Community acquis, including the regulation on risk preparedness in the electricity sector.
- The goal is to **increase security of electricity supply** in Europe:
 - Identify competent authorities and elaborate risk preparedness plans by CPs.
 - Increase information sharing among CPs and MSs.

Thank you
