

## ***ECDSO-g Coordination Platform***

### ***Results & goals***

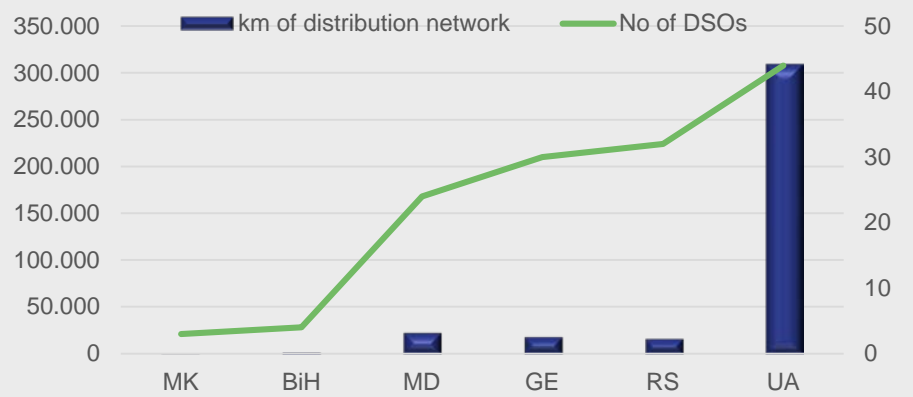

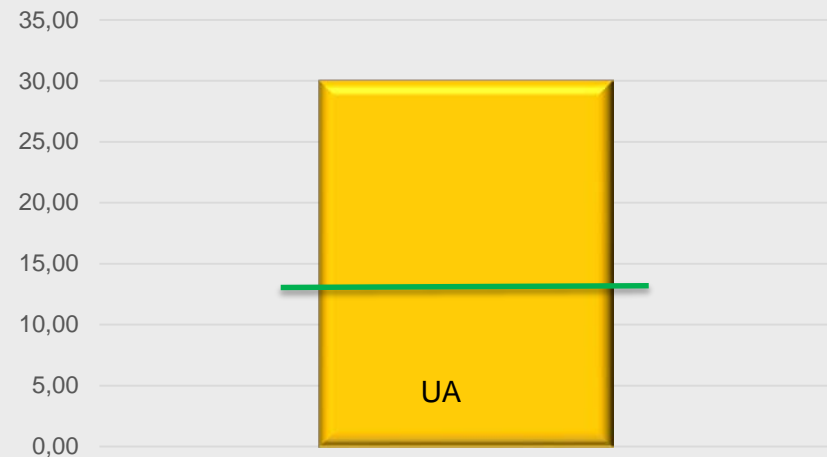

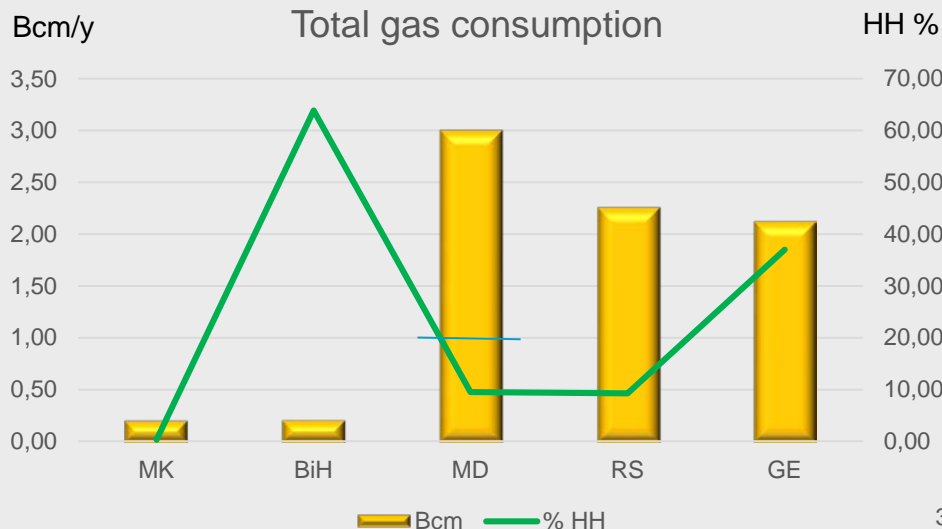

*Karolina Čegir, Gas Expert*

14th Gas Forum, Hotel Lev, Ljubljana, 24-25 September 2019

- Established in 2016
- Meetings twice per year
- Involvement of distribution system operators in the Energy Community activities
- Communication platform to exchange experience, cooperate and being represented further by one voice
- Link to EU gas industry and to electricity DSOs
- Many topics opened: tariffs, unbundling, role of DSO, cooperation with other SOs, investments, regulation, losses, non-measured delivery, smart meters, biogas in network.....

streamlined in 2 task forces (unbundling and measurement)

# Gas distribution sectors in the Contracting Parties

Contracting Parties:

Total transmission network~45.000 km

Total distribution network~370.000 km

Structure: commodity – capacity components

Allowed income: Cost reflectiveness

Incentives for development / smart metering

Allowed losses

.....

**Policy guidelines on distribution network tariffs (2018)**

Principles: predictability, transparency, respecting economic environment, regulation method

Required revenues for network operation

Incentive regulation

Cost allocation and design of network tariffs

- Non measured quantities
- Loses / technical & commercial
- Customers' profiles
- Smart metering
- Units
- Calibration
- Meter' ownership
- .....

**Policy guidelines on measurement in natural gas distribution network (2019)**

- Legal basis
- Metering & Billing
- Units
- Measurement equipment
- Non measured delivery
- Customer profiles & consumption norms

Detailed questionnaires

Albania 1/1 (CO)

BiH 0/5

Georgia 3/30 (1)

Moldova 1/25 (1)

North Macedonia 0/3

Serbia 0/33

Ukraine 31(38) / 44 (23)

**Report on DSO unbundling (2019)**

- Legal unbundling
- Functional unbundling
- Accounting unbundling
- Information unbundling
- Monitoring
- Identity separation
