

Reporting obligations under the Governance Regulation

Peter Pozsgai

Governance Expert, Energy Community Secretariat

Integrated reporting – Biennial Progress Reports (2025 + every 2nd year)

Integrated national energy & climate progress report incl. final inventories (2025)

Renewable energy

Energy efficiency

Energy security

Internal energy market

Energy poverty

Research, innovation and competitiveness

GHG policies and measures and projections (2023/2025)

Climate change adaptation planning & strategies + carbon pricing revenues + support to dev. countries (2023)

Annual reporting

Oil stocks (2023)

Appr. & final GHG inventories (2025)

Reporting on the 2020 targets (2022)

+ *Dedicated online reporting platform (E-platform)*

Reporting on the 2020 targets

- **Subject:** report to the Secretariat on the achievement of the national overall targets for the share of energy from renewable sources in 2020
- **Formal deadline:** 30 April 2022;
- **Content:**
 1. the sectoral (electricity, heating and cooling, and transport) and overall shares of energy from renewable sources in 2020;
 2. the measures taken to achieve the 2020 national renewable energy targets, including measures related to support schemes, guarantees of origin and simplification of administrative procedures;
 3. the share of energy from biofuels and bioliquids produced from cereal and other starch-rich crops, sugars and oil crops in energy consumption in transport;
 4. the share of energy from biofuels and biogas for transport produced from feedstocks and of other fuels listed in Part A of Annex IX to Directive (EU) 2018/2001 as adapted and adopted by Ministerial Council Decision 2021/14/MC-EnC in energy consumption in transport.

Reporting on the 2020 targets

ANNEX IX

Part A. Feedstocks for the production of biogas for transport and advanced biofuels, the contribution of which towards the minimum shares referred to in the first and fourth subparagraphs of Article 25(1) may be considered to be twice their energy content:

- (a) Algae if cultivated on land in ponds or photobioreactors;
- (b) Biomass fraction of mixed municipal waste, but not separated household waste subject to recycling targets under point (a) of Article 11(2) of Directive 2008/98/EC;
- (c) Biowaste as defined in point (4) of Article 3 of Directive 2008/98/EC from private households subject to separate collection as defined in point (11) of Article 3 of that Directive;
- (d) Biomass fraction of industrial waste not fit for use in the food or feed chain, including material from retail and wholesale and the agro-food and fish and aquaculture industry, and excluding feedstocks listed in part B of this Annex;
- (e) Straw;
- (f) Animal manure and sewage sludge;
- (g) Palm oil mill effluent and empty palm fruit bunches;
- (h) Tall oil pitch;
- (i) Crude glycerine;
- (j) Bagasse;
- (k) Grape marcs and wine lees;
- (l) Nut shells;
- (m) Husks;
- (n) Cobs cleaned of kernels of corn;
- (o) Biomass fraction of wastes and residues from forestry and forest-based industries, namely, bark, branches, pre-commercial thinnings, leaves, needles, tree tops, saw dust, cutter shavings, black liquor, brown liquor, fibre sludge, lignin and tall oil;
- (p) Other non-food cellulosic material;
- (q) Other ligno-cellulosic material except saw logs and veneer logs.

Integrated reporting

- **Subject:** report to the Secretariat on the status of implementation of the NECP and information on the progress accomplished towards reaching the objectives targets and contributions;
- **Formal deadline:** by 15 March 2025 and every 2 years thereafter;
- **Content:**
 1. Implementation of trajectories and objectives: overall RES share in GFEC 2025-2030, sectoral share of RES in FEC in electricity heating, cooling and transport, trajectories per RES technology and total expected gross final energy consumption per technology and sector in Mtoe and total planned installed capacity per technology and sector in MW, trajectory on bioenergy demand (electricity, heat and transport) and biomass supply by feedstock and origin. Forest biomass – source assessment and impact on LULUCF;
 2. Implementation of policies and measures: PaMs to achieve the national contribution to the EnC 2030 targets, regional cooperation, financial support for RES in ele, heating, cooling and transport, assessment of RES support schemes, measures on regulatory, permitting and administrative procedures, grid connections, information and training, the measures to assess and reduce the need for must-run capacity that can lead to curtailment of RES, measures to promote and facilitate the development of renewables self-consumption and renewable energy communities, measures promoting the use of energy from (sustainable) biomass and increase the share of renewable energy in the heating and cooling and transport sectors, PaMs facilitating the uptake of power purchase agreements.
