15/08/2019

EMS AD APPROVAL ON RULES ON KEY MARKET DATA PUBLICATION

Energy Agency of the Republic of Serbia Council approved the Rules on key market data publication on 15 August 2019, which was previously approved by EMS Assembly. After the Agency Decision publication in the Official Gazette, the Rules were published at the EMS web page and came into force the eight day from the day of its publication.

New version of this Rules is based on the previous Rules on key market data publication, which was approved in 2016, which had to be compliant with changes in the ENTSO-E documents, relied to the Regulation 543/2013 implementation. This EC Regulation defined the list of key market data, which have to be publicly available to all market participants at the electricity market via European platform for transparency (EMFIP – ENTSO-E platform).

Regulatory developments in Serbia #5

24/04/2019 – 09/10/2019

APPROVAL OF THE METERING DEVICES OVERTAKING PLAN ON THE DISTRIBUTION SYSTEM, ISSUED TO THE DISTRIBUTION SYSTEM OPERATOR

Energy Agency of the Republic of Serbia Council made the Decision on approval the Metering Devices Overtaking Plan, connection cables, installations and equipment in metering point and other equipment in customers' objects and generators on the distribution level for the period 2019-2020, which was drafted by the Distribution System Operator EPS Distribution LLC.

22/08/2019

In line with the Energy Law, all these devices should be in the Distribution System Operator's ownership till the end of 2020 the latest. Distribution System Operator EPS Distribution LLC will inform the Ministry of energy and mining and the Energy Agency on this overtaking.

Metering Devices, metering points and connection cables overtaking should result in their better maintenance, control and replacement with modern equipment with the goal to increase metering accuracy and decrease of electricity losses in the distribution system, being the interest of the final consumers and Distribution System Operator.
