* The EU4Energy Initiative covers all EU support to improve energy supply, security and connectivity, as well as to promote energy efficiency and the use of renewables in the Eastern Partner countries Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine. It does this by financing projects and programmes that help to reform energy markets and to reduce national energy dependence and consumption. Over the longer term, this makes energy supply more reliable, transparent and affordable, thus reducing energy poverty and energy bills for both citizens and the private sector. A robust legislative and regulatory framework is vital for the development of a sustainable energy sector. The EU4Energy governance project, part of the EU4Energy Initiative of the European Union, works with the six Eastern Partner countries to strengthen their legislative and regulatory frameworks, to draft policy recommendations, and to help identify investment opportunities in key strategic energy infrastructure projects.
