

LEAP User Group: Participants' feedback

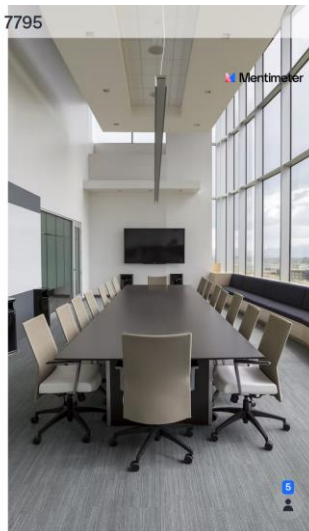

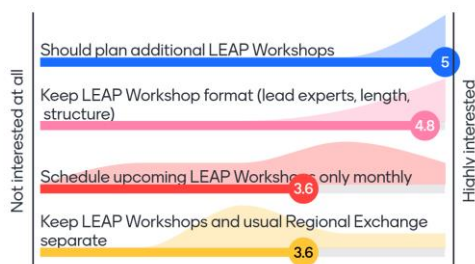

Background

Various participants of the Regional Exchange of NECP Modellers leverage on the Low Emissions Analysis Platform (LEAP) developed at the Stockholm Environment Institute. The majority of participants decided to create a LEAP User Group, which would facilitate a discussion of topics specific to modelling with LEAP in the NECP context. The LEAP User Group was open to all participants of the Regional Exchange of Modelling Experts and colleagues. On 17-Mar-2022, after the first cycle of LEAP User Group workshops (24-Feb to 17-Mar-2022), participants provided their feedback on the LEAP User Group via a mentimeter poll.

Feedback: Continuation and format of LEAP Workshops

Go to www.menti.com and use the code 5951 7795

Would you want the LEAP User Workshops to continue?

Feedback: Content of LEAP Workshops

Go to www.menti.com and use the code 5951 7795

What LEAP specific topics would you want to exchange on in the future?

- optimization
- non-energy sectors
- transport sector modellin
- re communities in leap
- modelling of prosumers
- res in transport
- hydrogen modelling
- optimisation
- hydrogen feasibility
- co2 emissions target
