

## Discussion paper for EECG

### The Regional Energy Efficiency Programme for the Western Balkans (REEP)

#### – Policy dialogue

*June 2016*

---

Since 2013, the ECS and EBRD, together with their consultants ECA (the REEP team), have worked with you to provide you with assistance in three areas: support with the transposition of ESD and EPBD, public procurement of energy efficient equipment and utility energy efficiency obligation schemes.

As a result, over the last 3 years, the REEP team have delivered 2 primary laws and 14 regulations across the region.

With respect to your experience working with the REEP team and/or related policy issues, we'd be interested to hear your views at the next EECG on:

#### **a) What worked well?**

What aspects of the support from the REEP team do you think worked well for you?

Were there certain ways the REEP team worked that you liked?

Were there certain outputs that you think were particularly useful?

#### **b) What do you think could have worked better?**

What aspects of the support from the REEP team do you think could have been changed?

Were there certain ways the REEP team worked that you think could have been improved?
