

RGC Decarbonisation: Biomethane

3 mln m³ of biomethane
Launching in 2022

10 projects
in the pipeline for 2023

20 projects
on preparatory stage
and planning

18 mln m³ of biomethane
Launching in 2023

Created a one-stop-shop for biomethane producers –
handled up to **30 applications** for potential connections and provided detailed calculations

RGC Decarbonisation: Hydrogen

- Continuing test on hydrogen blending in the distribution network
- Suspended operation of 3 out of 5 test sites in the closest regions to the military zone
- Conducting laboratory and special technical studies in hydrogen-filled environment (seals, and pipes)
- Successfully passed metrological tests of 83 various types of residential gas meters on 20% hydrogen blend
- Preparing for real-network tests and looking for an electrolyzer

RGC is a member of Ready4H2

This consortium brings together DSOs from 13 EU countries and Ukraine

Ready4H2 – 67 companies –
DSOs with expertise in hydrogen
and understanding how distribution networks
can unlock the potential of reducing
the carbon emissions

RGC is a member of MARCOGAZ

RGC is a member of European Clean Hydrogen Alliance

European Clean
Hydrogen Alliance
