

# >> NEW REGULATIONS ON ENERGY LABELLING

# New energy labels (rescaling)

- > **Additional information for consumers**
- > **Replacing previous (A+++ to D) with a redesigned and rescaled (A to G) labels**
- > **CPs are following those changes on voluntary basis**

Source: European Commission

Regulation (EU) 2019/2013 on energy labelling of **electronic displays**

Regulation (EU) 2019/2014 on energy labelling for **household washing machines and washer-dryers**

Regulation (EU) 2019/2015 on energy labelling for **light sources**

Regulation (EU) 2019/2016 on energy labelling for **refrigerating appliances**

Regulation (EU) No 1059/2017 on energy labelling for **household dishwashers**

# Existing EnC Regulations which will be repealed

1059/2010-  
Household  
dishwashers

1060/2010-  
Household  
refrigerating  
appliances

1061/2010-  
Household  
washing  
machines

1062/2010-  
Televisions

626/2011- Air  
conditioners

392/2012-  
Household  
tumble driers

874/2012-  
Electrical lamps  
and luminaires

665/2013-  
Vacuum  
cleaners

811/2013-  
Space heaters

812/2013- Water  
heaters &  
storage tanks

65/2014-  
Domestic ovens,  
hobs and range  
hoods

1254/2014-  
Residential  
ventilation units

2015/1094-  
Professional  
refrigeration

2015/1186-  
Local space  
heaters

2015/1187-  
Solid fuel boilers

-  Remain active in EnC
-  To be repealed with new Regulations

# General approach

**Standard adaptations: MS → CP, etc.**

## **Specific adaptations – for discussion:**

- no access to EPREL – relevant articles deleted/changed – e.g. technical documentation is made available directly at the request of the market surveillance authorities.
- an electronic label shall be made available to dealers for model registered in the EU product database
- for models placed only on the CPs markets of which are not registered in the EU product database, the label shall be generated without the EU logo, and the QR code shall be linked to the website with model's information maintained by the manufacturer.

**Transposition deadline: 31 December 2023**

1. *EECG March 2021: Rescaling of Energy Labels and new EU regulation*
2. *EECG Nov 2021: Plan for adoption of products labelling regulations*
3. *EECG March 2022: Progress with the transposition of labelling framework*
4. *PHLG 2022: New products labelling regulations – proposal for 2022 adoption*
5. *Finalisation and adoption at MC 2022*

The background is a dark blue image of the Earth from space, showing the outlines of continents. Overlaid on the Earth are numerous glowing blue lines that form a complex network, representing energy or data connections. The lines are bright and have a slight glow, creating a sense of dynamic activity.

*EMAS certification:  
Greening of the  
Energy Community Secretariat*

# What is EMAS?

*It is a voluntary environmental management scheme instrument designed by the European Commission*

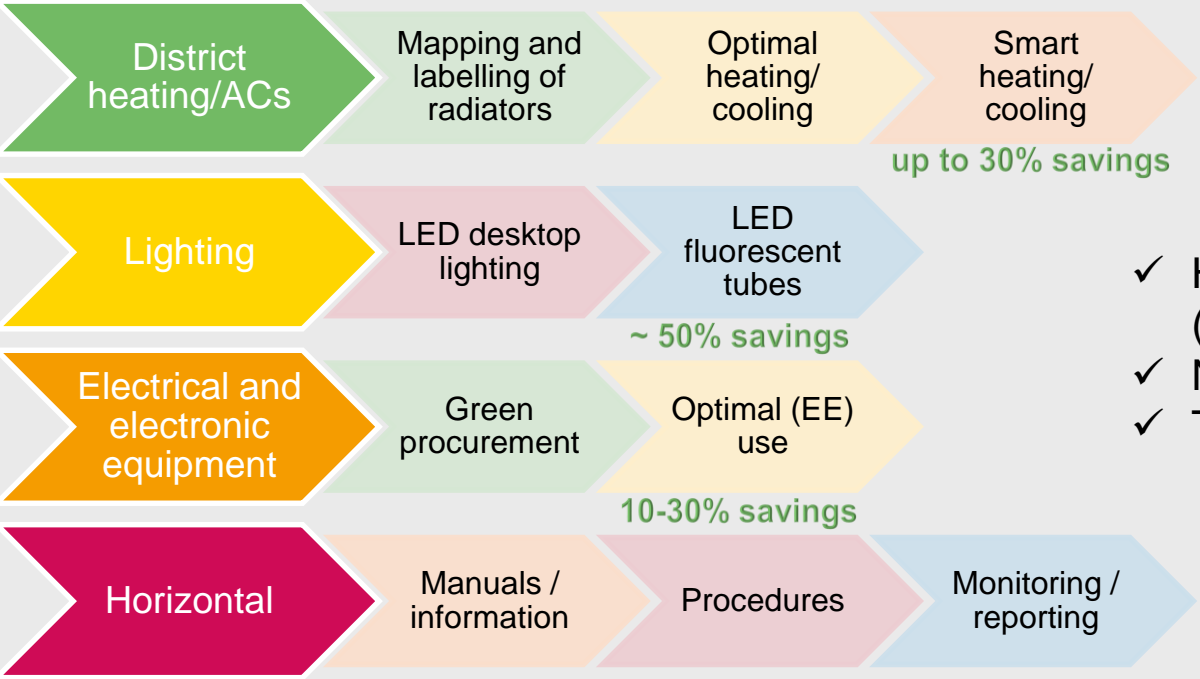

## Key performance indicators versus doability/relevance

|   |                           |   |
|---|---------------------------|---|
|   | BIODIVERSITY/<br>LAND USE | tenants in a listed building in the middle of the city  |
|   | WATER                     | costs known, no direct correlation with our consumption   |
|   | EMISSIONS                 | 2019 3.6 million flight kms, 1.1 million kms by the staff, besides the decision NOT to fly, limited options |
|   | WASTE                     | new cleaning contract / recycling / records in place  |
|   | ENERGY<br>EFFICIENCY      | 100% green electricity supplier, 100% LED lighting, smart heating system etc.                               |
|  | MATERIAL<br>EFFICIENCY    | awareness raising and purchase practices incorporation of SUSTAINABILITY CRITERIA = key action              |

# Energy Efficiency related measures

**Secretariat's energy costs: 69% district heating, 31% electricity!**

## Smart heating system:

- ✓ Humidity increased 10-20% (now between 45-55%)
- ✓ New manual in Easy app
- ✓ Testing of **cooling integration**

## Equipment consumption / optimization:

# New energy efficiency measures – LED lighting

- Research and 3w testing (light intensity, color, comfort)
- Replacement of 165 old fluorescent tubes (5<sup>th</sup> floor) with LED
- Waste disposal in cooperation with manufacturer

## Characteristics of new LED:

- Highest A++ class - 55% more efficient
- No flickering and right cool white colour (4000K) - ideal for offices
- Average duration: 60 000 h and 5 y guarantee (3 times more than old, > 15 years)
- Adjustable position (up to 160° angle)

## Costs / savings / PBP

|  |        |
|--|--------|
| Tubes 60cm (pcs)   | 62     |
| Tubes 150cm (pcs)  | 103    |
| Electricity price - last bill (eur)                                    | 0,20   |
| Average working hours of bulbs (h)                                     | 5      |
| Consumption per year kWh OLD (kWh/y)                                   | 9217,0 |
| Annual costs OLD (EUR)   | 1845,2 |
| Consumption per year NEW (kWh/y)                                       | 3724,5 |
| Annual costs NEW (EUR)   | 745,6  |
| Annual savings kWh   | 5492,5 |
| Annual savings EUR   | 1099,6 |
| Investment costs for purchase of new LED tubes (EUR)                   | 2000,0 |
| Payback period (years)   | 1,8    |
| Addition savings due to 3 x greater lifespan (cover instalation costs) | 716,3  |

## Next steps:

- > Testing corridor light optimisation and control (by light intensity, duration)
- > Split light switching in some offices
- > Integration of lighting in smart app
