

PROGRESS on NECPs PREPARATION

9th Energy and Climate Technical Working Group

7 April 2022

NECP timeline

- Proposed timeline in the adapted Governance Regulation
- Builds on the existing EnC NECP Ministerial Council Recommendation and work achieved so far, but also considering the time needed to adopt national legislation after the adoption of Governance Regulation by the Ministerial Council

NECP – content (Art. 3 – 8 and Annex I)

- Overview and process for establishing the Plan, including description of public consultation and involvement of stakeholders
- **National objectives, targets and contributions to the five Energy Union dimensions**
- Policies and measures (PAMs) corresponding to the objectives, targets and contributions
- Description of the current situation of the five dimensions
- Assessment of the impacts of the planned PAMs
- Investment needs and sources of finance in their NECP
- Analytical basis (projections, impact assessment of planned PAMs)
- List of parameters and variables

European
Commission

E-platform

Online e-platform (Art. 28)

- To facilitate communication between the Commission and Member States
- To promote cooperation among Member States
- To facilitate public access to information
- The Commission made it operational on 1 January 2020
- The EnC e-platform shall become operational by 1 January 2023

Online e-platform (Art. 28)

- Should server as a point for submission of:
 - Progress reports (Art. 17),
 - PAMs and projections,
 - adaptation, financial support to developing countries, and carbon price revenues,
 - Minimum stock of crude oil,
 - GHG inventories,
 - 2020 renewable energy and energy efficiency targets achievement
- NECPs, their updated and LTS should be made public on this platform

E-platform in the EU

Energy and climate governance and reporting

This page serves as the e-platform used by EU countries to submit information on climate and energy progress. It also provides information on the governance system (rules) and national reports.

National energy and climate plans

EU countries' 10-year national energy and climate plans for 2021-2030.

National long-term strategies

EU countries' long-term strategies to meet their Paris Agreement commitments and the energy union objectives.

Energy union and climate action rules

Rules for EU countries' cooperation and reporting on energy and climate policies.

Reporting system for EU countries

From 2021, EU countries are required to submit information on climate and energy progress.

E-platform in the EU

- Two reporting tools – ReportENER and Reportnet 3.0
- ReportENET – for energy related information
- Reportnet 3.0 – administrated and developed by the EEA
 - Serves as a point for reporting of climate related information (Article 18, 19, 26(2) and 26(3))
 - It will also serve as a reporting platform for climate related information of progress reporting (Art. 17)

Thank you!
