

# Energy Community Contracting Parties / gas sector

- Total natural gas consumption ~ 38 Bcm/y
- Total natural gas production ~ 20 Bcm/y
- UGS capacity ~ 31,5 Bcm
- No LNG terminals

• **Tranzit ≈ 70 Bcm**

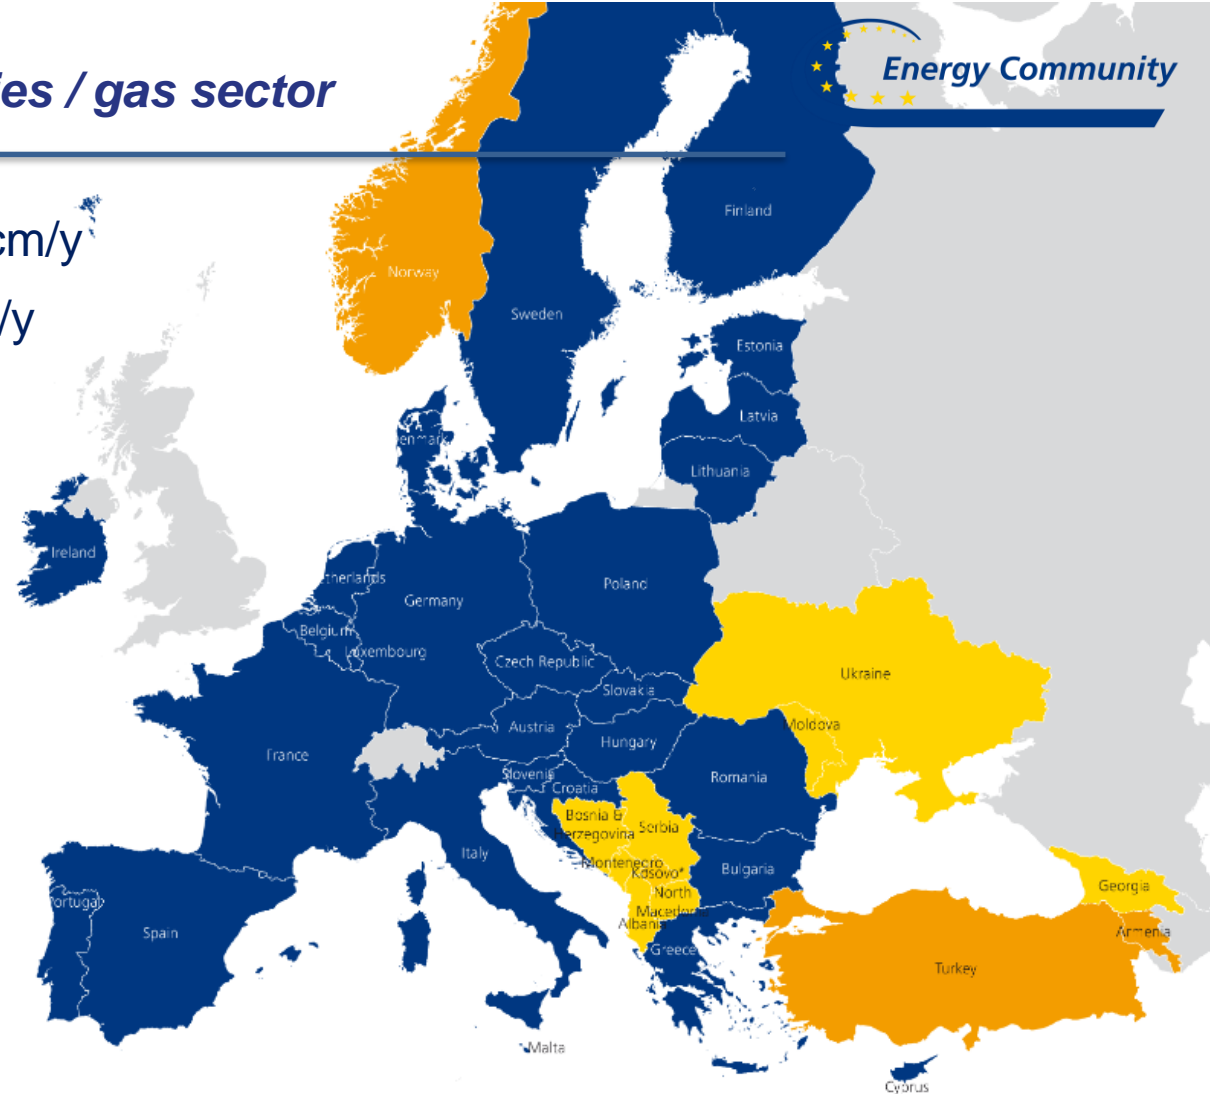

14 producers  
2 SSOs  
14 TSOs  
136 DSOs

• Transmission network

~ **45.000 km**

• Distribution network

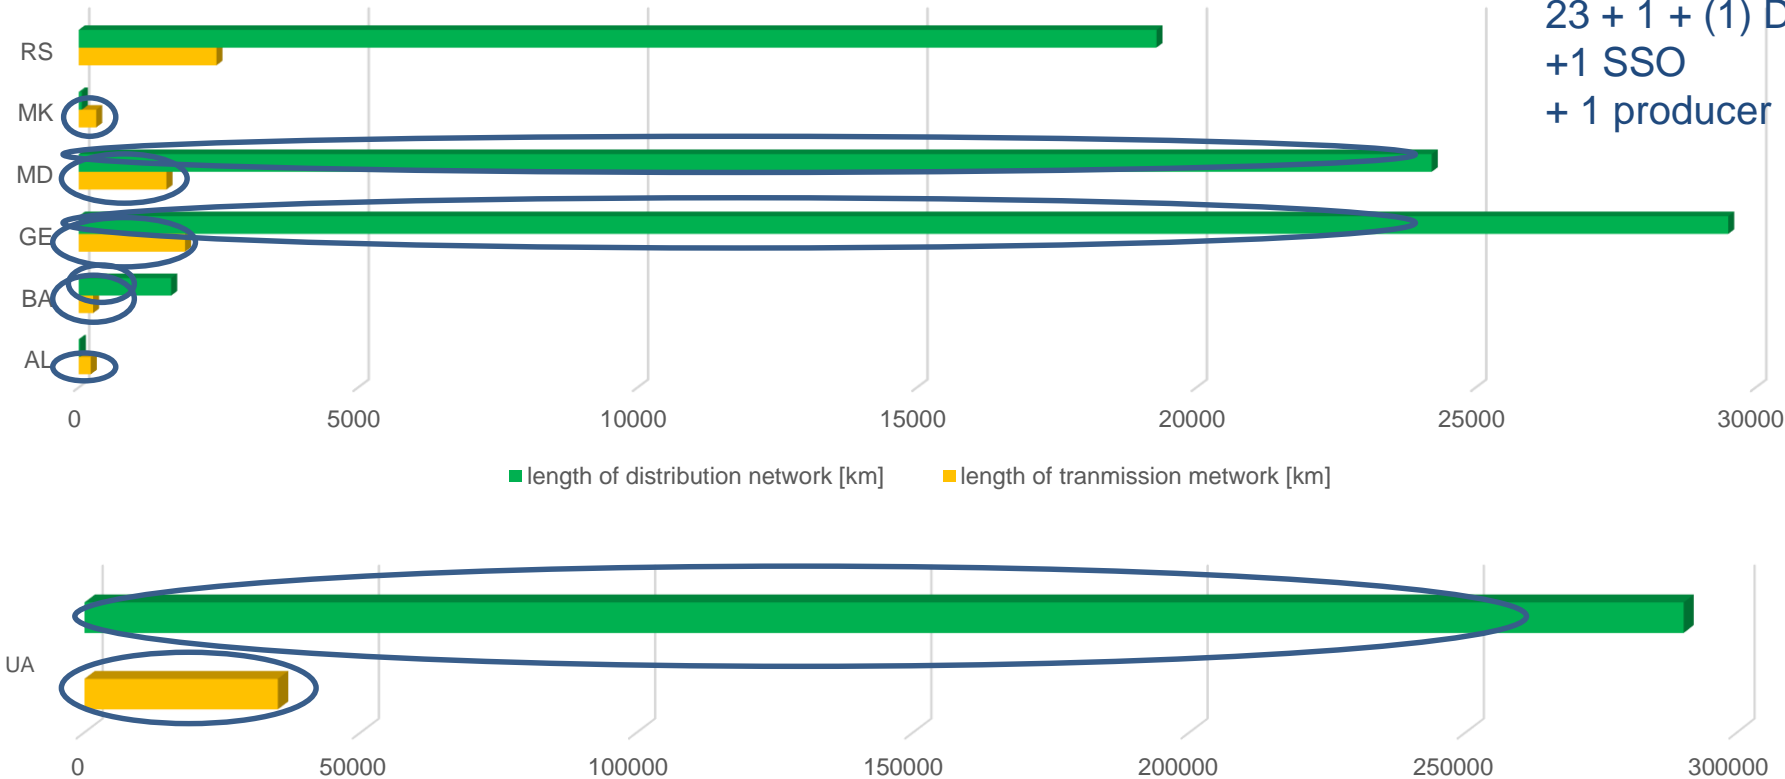

~ **370.000 km**

# Taking a part in the CH4 emissions reporting

6+1+(1) TSOs  
23 + 1 + (1) DSOs  
+1 SSO  
+ 1 producer

- As assessed: 200 kt methane emitted in 2019  $\approx$  0,3 % of world gas industry emissions
- 3 companies joined OGMP 2.0
- Correlations between reporting on methane emissions and total network losses
- Correlations with network tariffs
- Transparency
- Correlations with the emissions reported under UNFCCC
- Many stakeholders in the same area
- Importance of sharing the knowledge
