

Training on Energy Markets and Trading

17-18 October 2018

Vienna, Energy Community Secretariat (ECS), Am Hof 4, Level 6

Day I: 17 Oct 2018 | 13:30 – 18:00

Day II: 18 Oct 2018 | 09:45 – 17:30

SCOPE

Energy markets are characterized by continuous evolution that makes them more complex, hence difficult to understand. A continuous knowledge building of national energy regulatory authorities is very important having in mind the broad expertise required for pro-effective and effective regulation of the energy markets.

This training is **tailor-made for the national regulatory authorities** from the Contracting Parties of the Energy Community and aims at providing an understanding on energy markets and wholesale energy trading. Speakers on this event are highly experienced professionals with excellent understanding on regulatory developments and operational processes. A training on energy markets and trading was organized in December 2017 and due to very good feedback, Energy Community Secretariat is repeating it in a very similar format.

The training starts on the afternoon of 17 October 2018 with a session on basics of energy trading to continue with group activity on trading. The day will end with a visit at the trading floor of Verbund located across the Secretariat's office.

The program in the 18 October 2018 aims at giving an insight on electricity and gas market design and market evolution, with particular focus on risk management, trading and trading places.

All the training materials will be distributed after the training.

AGENDA
Day I - 17 Oct 2018
