

*Implementation of Transparency
Regulation 543/2013 in the Energy
Community Contracting Parties*

Energy Community Secretariat

Joint ECS-ENTSO-E Workshop on Implementing Transparency Regulation 543/2013 took place on 22 March 2017 with the aim to:

- a) take stock of the progress made in transposing and implementing Regulation 543/2013 in the Contracting Parties***
- b) strengthen cooperation on implementing Regulation 543/2013 in EnC CPs***

Conclusions

- In majority of the Energy Community Contracting Parties neither the straightforward transposition (transparency rules) nor the implementation by the TSOs (local IT platforms) are at the level that would ensure smooth integration with the ENTSO-E platform***
- ENTSO-E to establish an implementation group with regular meetings for the integration with the ENTSO-E transparency platform, but only after legal certainty is place and transparency platforms at national level are in the development phase EnC CPs. Until then, ad-hoc workshops or meetings are to be organized in case of questions from EnC CPs***
- Energy Community Secretariat to continue activities on facilitating, monitoring and regular reporting on transposition and implementation in close cooperation with ENTSO-E. In case of continuous compliance shortcomings the Secretariat will consider opening infringement cases***

CP	Transposition	Implementation (submission to ENTSO-E Transparency platform)
Albania	drafted	No
Bosnia and Herzegovina	Yes	Yes
Kosovo*	pending	No
The Former Yugoslav Republic of Macedonia	Yes	Yes
Moldova	drafted	No
Montenegro	pending	No
Serbia	Yes	Yes
Ukraine	pending	No
