

Decarbonisation Roadmap for the Contracting Parties of the Energy Community

Technical Working Group

21 October 2021

Stefano Sarris

Context

- 2020 Ministerial Council Conclusions (17 December 2020):
 - “The European Commission in cooperation with the Secretariat will launch preparatory work on developing a decarbonisation roadmap for the Energy Community until 2030 and beyond in the framework of the Energy and Climate Committee and its technical working group”
- Energy and Climate Committee (22 February 2021):
 - One-pager: dialogue on a decarbonisation roadmap for the energy community
- 60th Permanent High Level Group (25 March 2021):
 - Structure of a roadmap, timeline for its adoption, aim of roadmap
 - Conclusions

Context

- Technical Working Group (29 June 2021):
- 61st Permanent High Level Group (1 July 2021)
- Informal Ministerial Council (2 July 2021)
- Technical Working Group (21 October 2021)
- PHLG and Ministerial Council (24 and 25 November 2021)

Aim of the roadmap

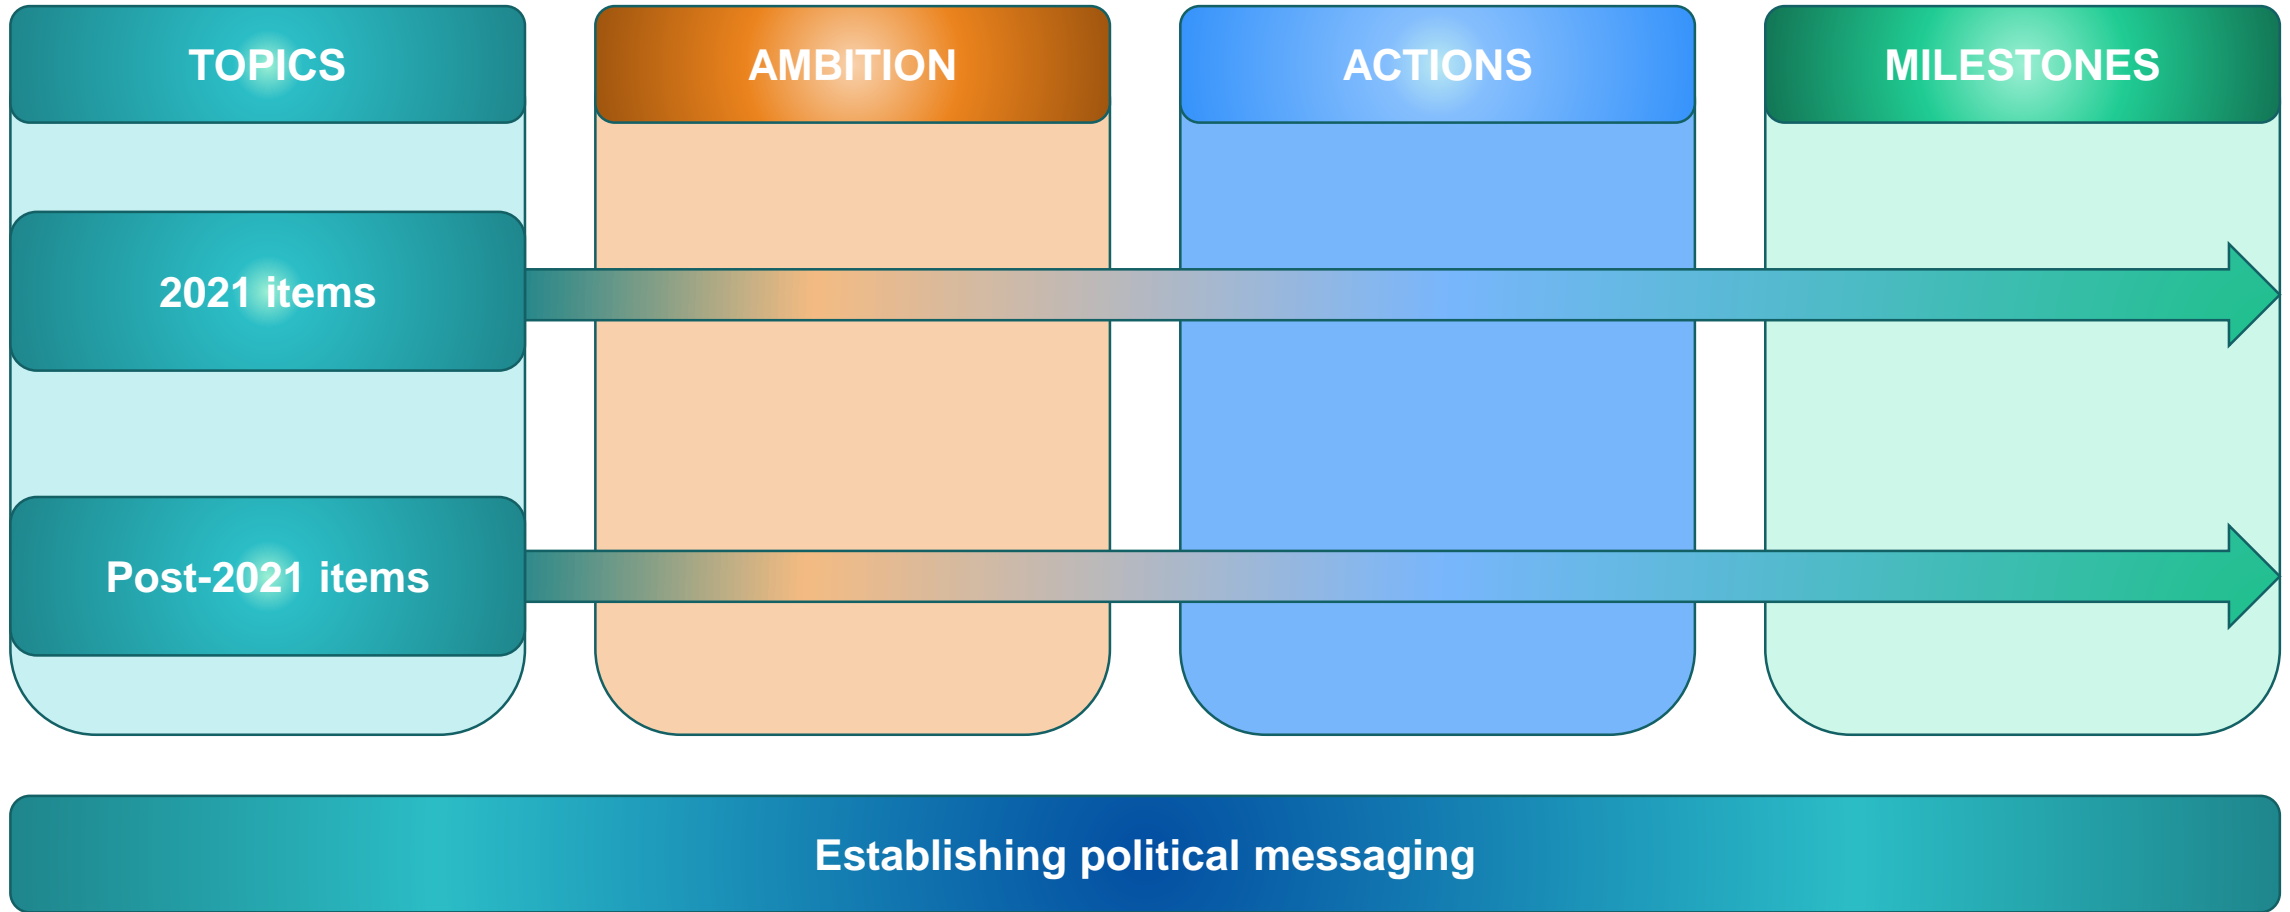

1. support a path towards 2030 energy and climate targets and mid-century climate neutrality for the Energy Community;
2. establishing a consistent dialogue with Contracting Parties on the decarbonisation priorities, the process, timeline and main elements of the roadmap;
3. take stock of the state of play of existing and planned decarbonisation efforts in an Energy Community and its Contracting Parties-wide roadmap, setting out a clear and predictable path for all stakeholders on the introduction of decarbonisation-related EU legal acts;

Aim of the roadmap

4. making progress on agreeing to a carbon pricing system for the Energy Community;
5. establishing shared political messages on subjects such as a coal phase-out and fossil-fuel subsidies

The decarbonisation roadmap will be updated biennially to keep the decarbonisation process of the Energy Community in focus over time.

Decarbonisation Roadmap Structure

Thank you!
