

# **implementation 2011**

## **working together towards results**

**Dirk Buschle**

- annual implementation report under preparation
- third package at the doorsteps
- secretariat launched 'boosting implementation' initiative in march with the goal of having the 2nd package implemented by the end of 2011
- two main problems identified
  - non-compliant market structures/designs
  - eligibility and scope of price-regulation
- has progress been achieved?

- rationale: from compliance comments to intense collaboration
- contracting parties and secretariat in dialogue
- recent examples
  - fyro macedonia
  - serbia
  - albania
  - croatia

- rationale: compliance assessment and identifying remaining gaps
- to be finalized and sent to each contracting party individually before the summer break
- for review and update
- to form the basis for internal 'roadmaps' towards next steps

## implementation partnerships

---

- rationale: full implementation, focus on secondary legislation
- requires largely compliant primary legislation
- based on memoranda with institutions in charge
  - structuring of implementation work within the institutions and with all relevant stakeholders
  - intensive cooperation and extended assistance by secretariat
  - full autonomy of the institutions concerned
- recent examples
  - fyro macedonia
  - unmik
  - moldova
