

EU4Energy

EU4ENERGY FOURTH YEAR WORK PROGRAMME MAY – DECEMBER 2020

Regional Activities | Armenia

- **RA 3** Launching the process related to identification of regional key energy infrastructure projects (including data collection)¹

The EU4Energy Initiative covers all EU support to improve energy supply, security and connectivity, as well as to promote energy efficiency and the use of renewables in the Eastern Partner countries Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine. It does this by financing projects and programmes that help to reform energy markets and to reduce national energy dependence and consumption. Over the longer term, this makes energy supply more reliable, transparent and affordable, thus reducing energy poverty and energy bills for both citizens and the private sector.

¹ The Process related to identification of regional key energy infrastructure projects was launched during the 2nd Year Regional Work Programme (May 2018 – April 2019). During the 4th Year Regional Work Programme (May – December 2020), these activities could continue if the countries submit any additional Projects
