

SEEGAS - Working meeting on regional Clearing

South East and East European Gas Platform – Connecting European Energy Markets

June 15, 2021

Gregor Weinzettel, Gas Expert, Energy Community Secretariat

From SEEGAS to SEECLEAR – Is market integration only possible through regional clearing cooperation?

We see a diverse development status of clearing services for energy markets in the region.

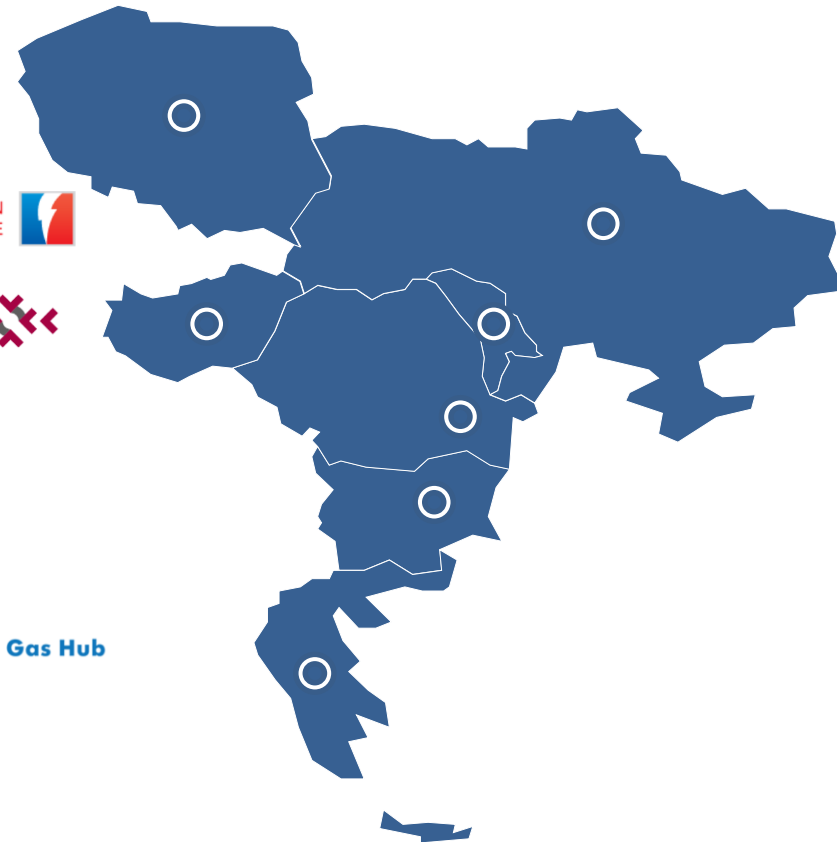

The costs for EMIR compliant CCPs are high and their independent creation is in the most cases not economically viable.

Having a coordinated approach for the clearing house development is the only way to achieve market interoperability or integration

Regional Partnership would allow to:

- Provide an economic feasible environment for the establishment of clearing services (CCP) for energy traded products
- Substantial investment costs would be able to be shared between the stakeholders
- Harmonization of applicable standards in the post trading environment (legal, technical, institutional)

SEE-CLEAR
Cooperation?

THANK YOU FOR YOUR ATTENTION
