

# Modelling study to set the 2030 energy and climate targets

*Tomasz JERZYNIAK  
Directorate-General for Energy  
European Commission*

# 2030 Modelling study - background

- *Political consensus by the 2018 Ministerial Council to set the 2030 energy and climate targets for EE, RES and GHG and adopt the relevant legislation;*
- *Commission launches a modelling study in consultation with the Contracting Parties as agreed at the 2019 Ministerial Council.*

# Modelling study – progress so far

- *December 2020 implementation start by the Commission,*
- *February 2021: joint workshop with the study team, all Contracting Parties, the Secretariat and the Commission,*
- *March-May 2021 data collection and verification in close cooperation with the Contracting Parties,*
- *Mat 2021: Bilateral workshops with each interested Contracting Party to discuss the modelling data and help build national modelling capacities,*
- *June 2021: second technical workshop in the framework of the Energy and Climate Technical Working Group*

# Modelling study – current status and next steps

- *Preparation of the Baseline scenario, consultation with the Contracting Parties once the baseline scenario is finalised in mid-July.*
- *Discussion on the possible policy scenario kicked-off at the June technical workshop*
- *A technical workshop planned in September to discuss the Baseline scenario and the policy scenarios as well as to hold a discussion on draft targets.*
- *Agreement on targets reached at the next meeting of the Permanent High Level Group, expectedly in late Autumn.*

**Thank you**
